

The National Agriculture Imagery Program (NAIP) 2004 is the best available state wide imagery source for Texas.

2004 NAIP imagery for Texas is available to the emergency response community over the next several days via the following methods:

1. USDA-FSA Aerial Photography Field Office Data Provisioning System (DPS)

DPS is a web based application that allows users to select imagery and the delivery formats based on the user defined Areas Of Interest (AOI). Delivery options include CD/DVD and FTP. *Please consider bandwidth restrictions when choosing the FTP option.*

The DPS requires a user account and if interested, the following information would be required:

User Name  
Email Address  
First Name  
Last Name  
Phone Number  
Agency/Office

Contact Lori Uhlhorn at [lori.uhlhorn@slc.usda.gov](mailto:lori.uhlhorn@slc.usda.gov) or 801-975-3500 ex214 for account requests.

2. For viewable 1994-1996 Digital Ortho Quarter Quads (DOQQ) for Texas, *no download is available*, please access the following web address:

<http://gdw.apfo.usda.gov/mdoq/viewer>

3. Compressed County Mosaics (CCM) are available via the Resource Data Gateway at the following web address:

<http://datagateway.nrcs.usda.gov>

For further information regarding this and other aerial imagery please view the Aerial Photography Field Office web site at <http://www.apfo.usda.gov>.
